

Most Advanced Daylighting Solutions

Day Lighting

- Reduce Carbon Footprint
- Improve Energy Efficiency
- Boost **Profits**

Day Lighting

Harness the Power of Sunlight

Natural light usage through modern engineering

Reduce Energy Cost

Reduces energy consumption by minimising need of artificial lights, resulting in reduced cost thus boosting profits

Visible results

Day Lighting

Architectural Integration

Incorporatedinto building design for **energy efficiency**, visual comfort, and safety

Health & Environmental Benefits

Improves on ground employee health by **increasing availability of Natural light** and its benefits.
Reduces carbon footprint by replacing usage of energy dependent lighting

Day Lighting

Huge size:
Length upto 4m
Width upto 1m

Even lighting throughout the site. Adds to a positive work environment

Custom Solutions

Correct Lux Levels

Light intensity provided based on BEE guidelines for the type of work performed

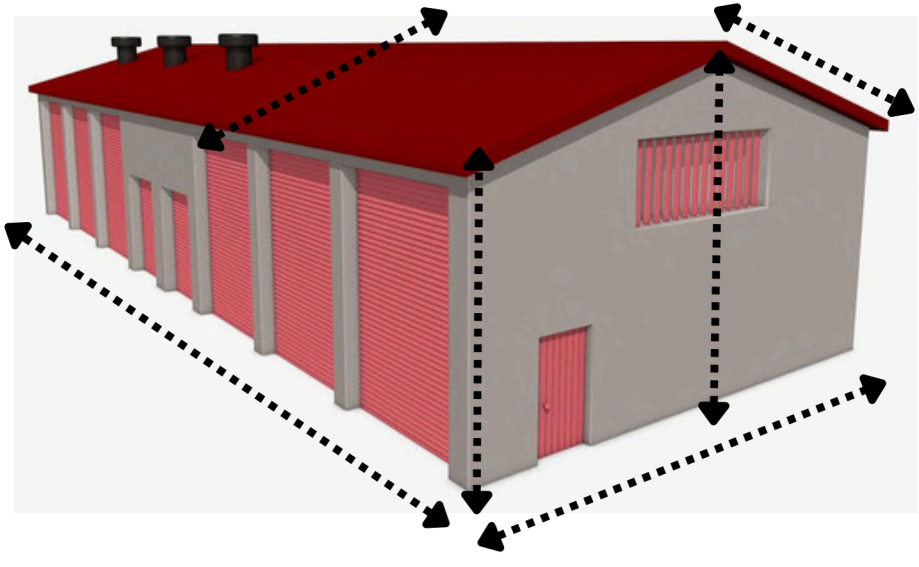

Roof Compatibility

100%customised and compatible roof adaptors for all roof types

Accurate Shed Measurement

Wetakethe length, width, minimum and maximum height of the shed as seen below

Structural Intergration

Interior Layout Analysis

Accounts for false ceilings, machine layout, cranes, and racking

Sunlight Trajectory Study

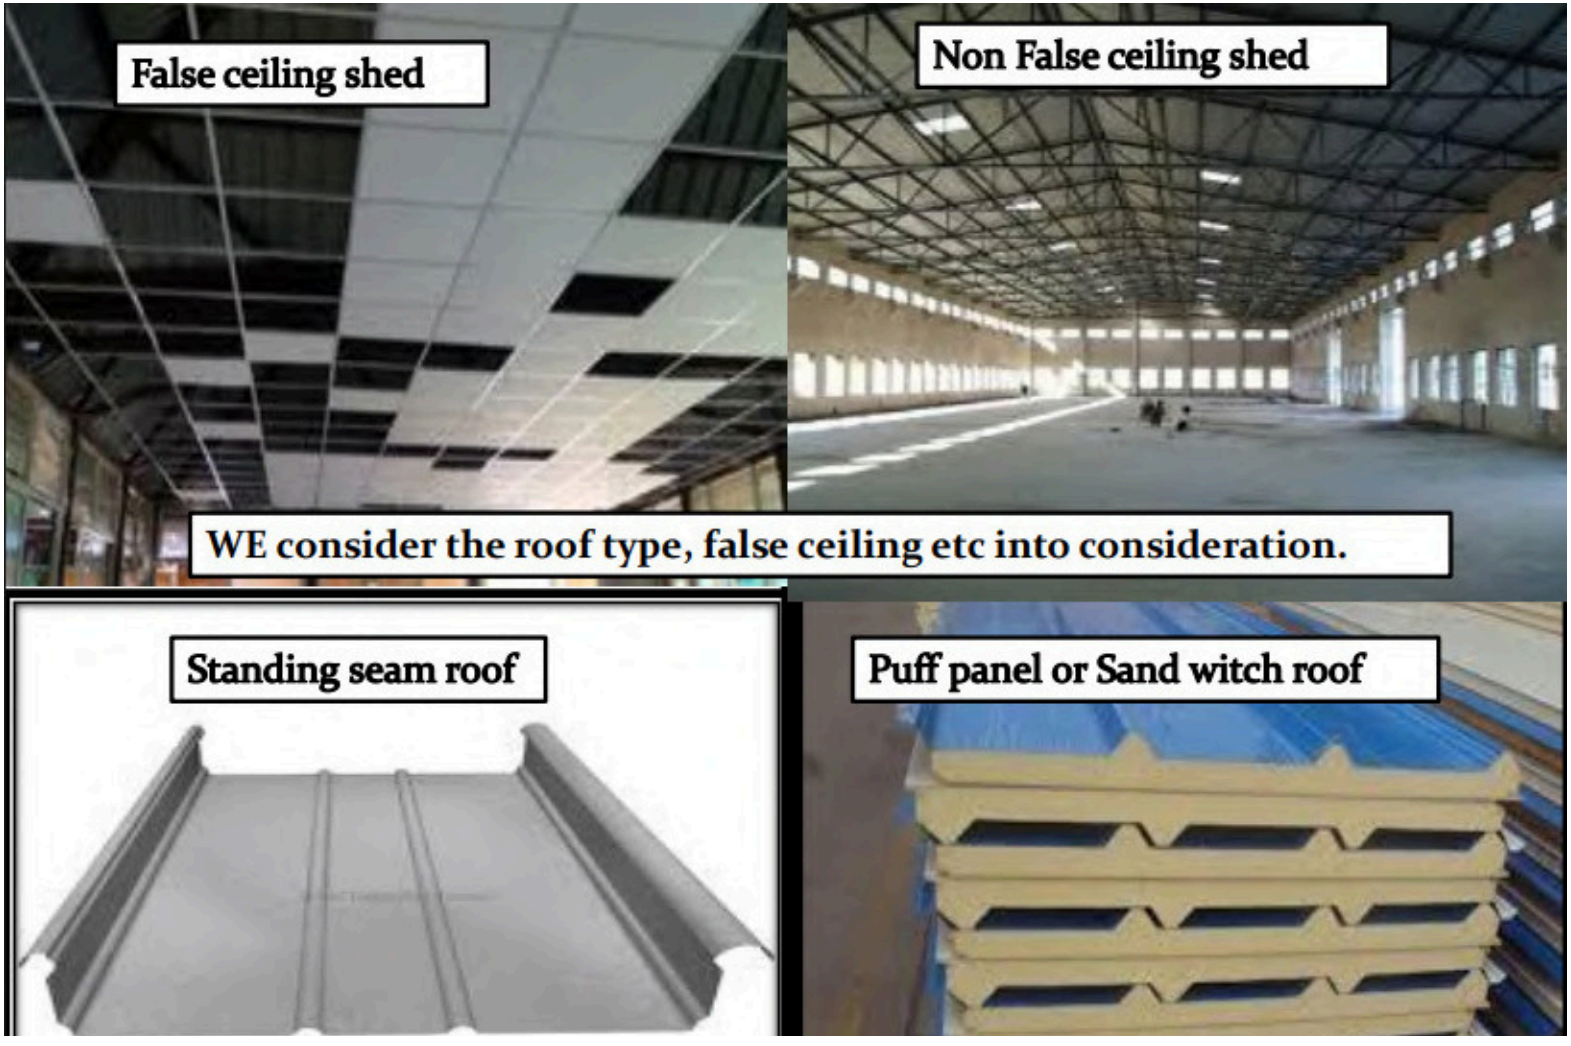

Historical monthly/yearly daylight data used for accurate design

Structural Intergration

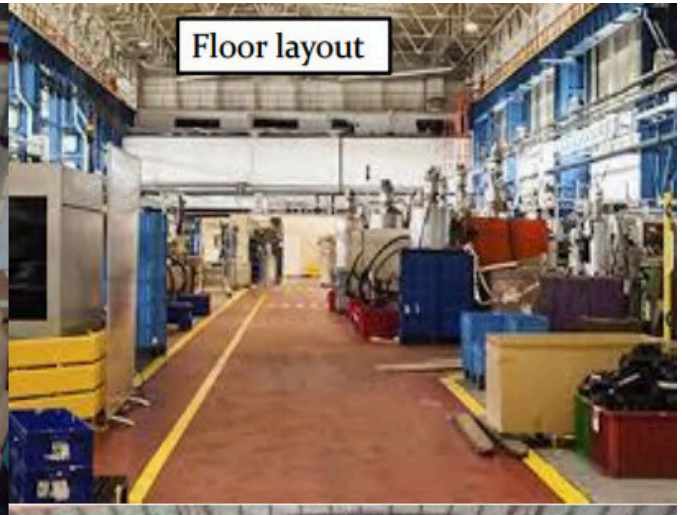

Structural Intergration

Structural Intergration

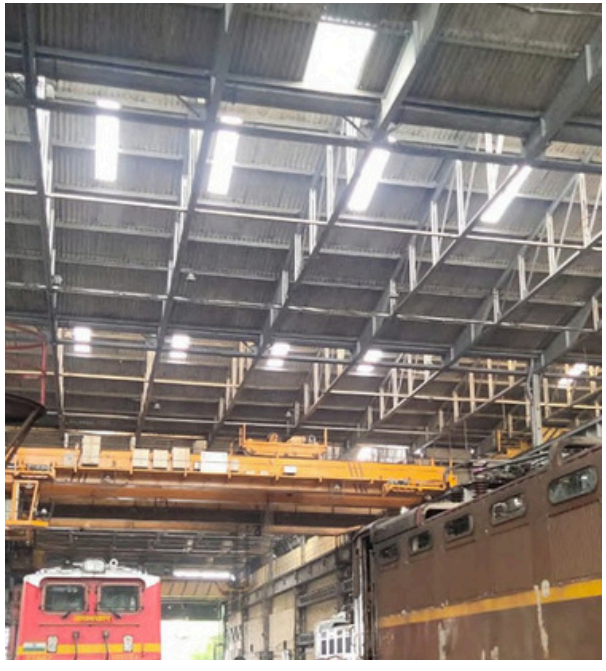

Zero Energy Lighting

- 20+ years life
- 100% customisable solutions
- Superior Protection From Heat
- 4 Layer Leakage Protection

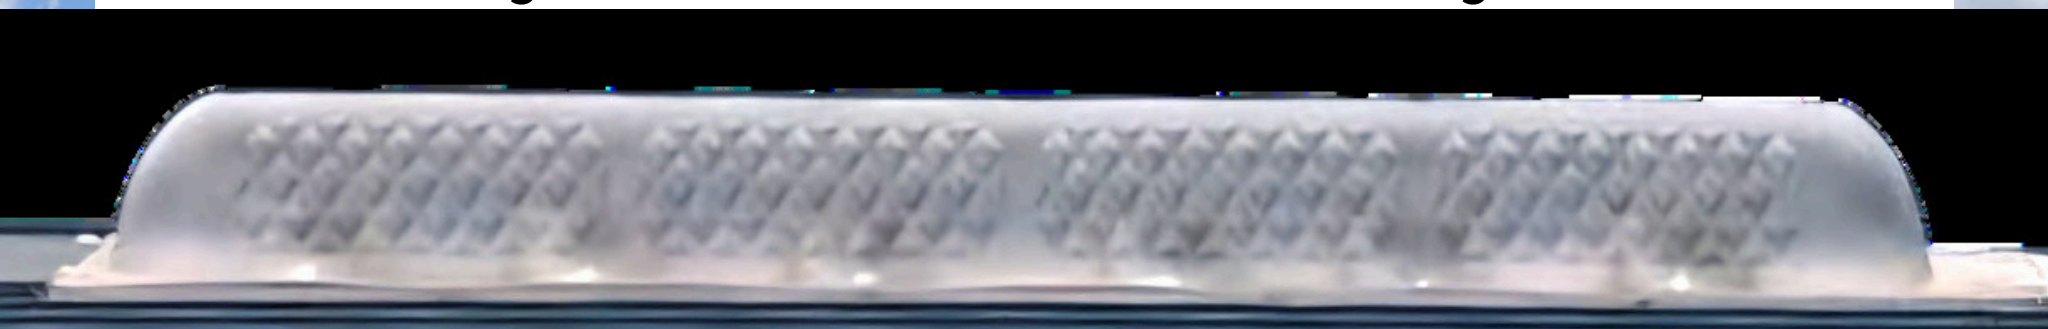

Brilantor

- Unique solution with Advanced Engineering and Design
- UV and IR Protection.
- One of the Biggest and widest models available globally
- International Safety Standards Compliant
- The only Product with Safety Grill

Brilantor

Light Moderator

Panel element designed to counter harsh top sun light during mid noon

240+ Prismatic Diamond Lenses

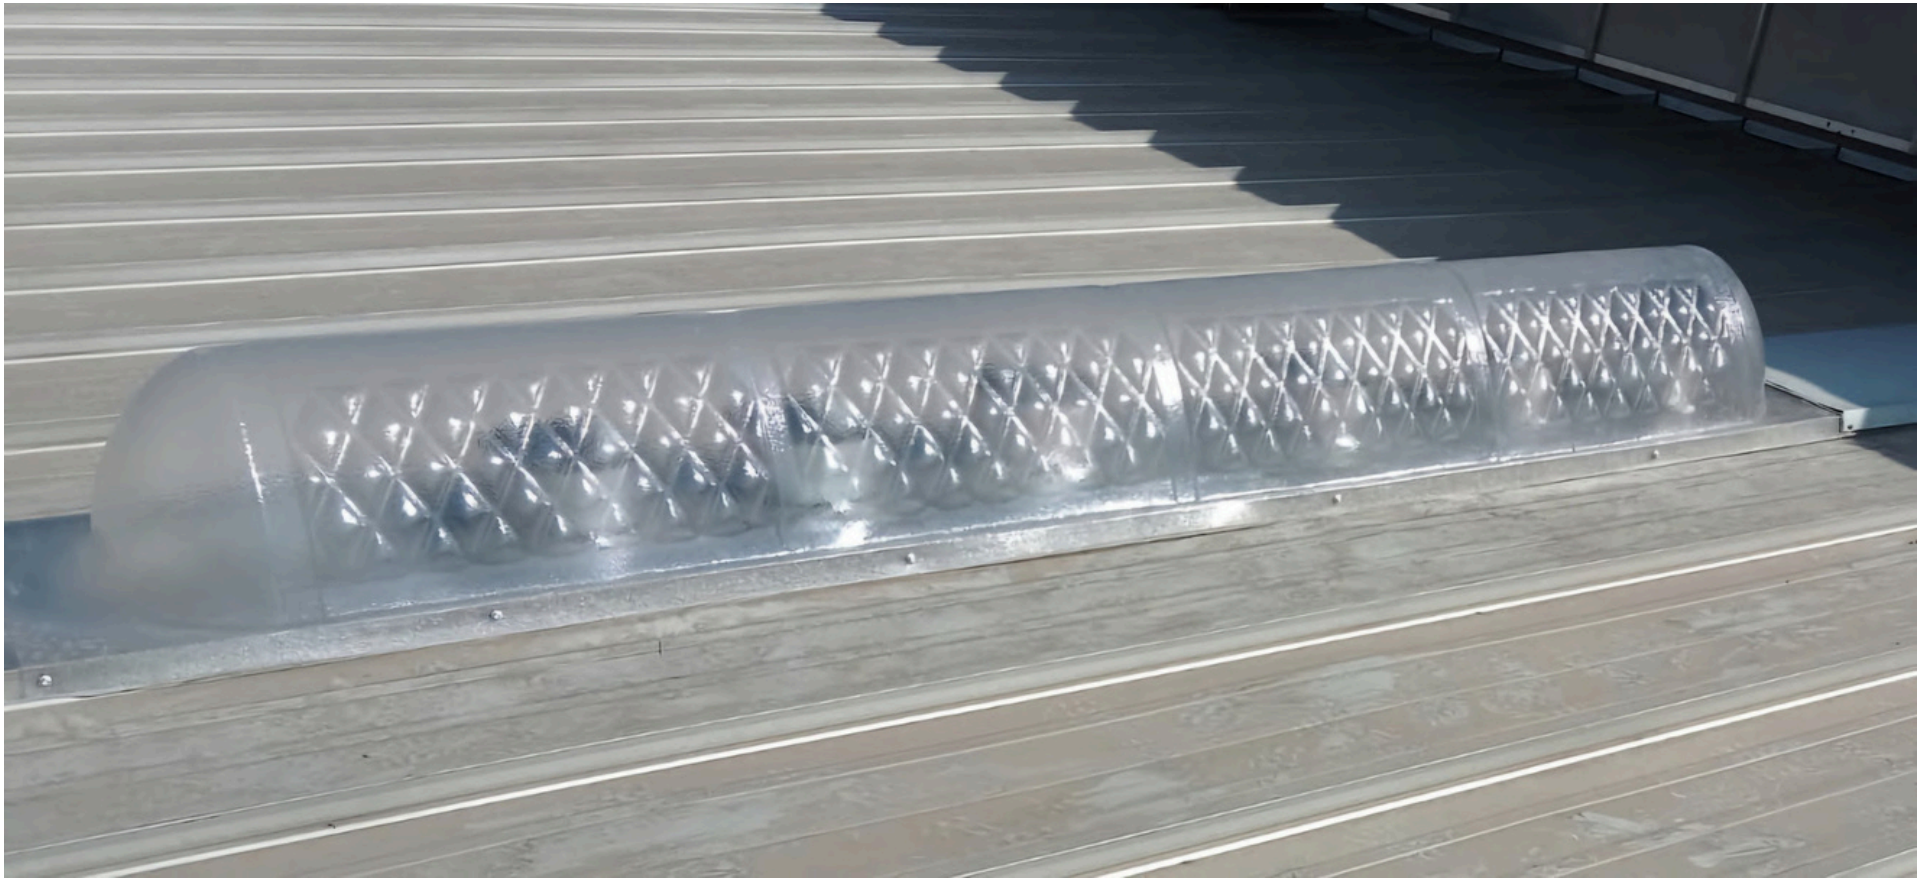

Enhance lightingat low lightanglesof morning, late noon, and evening

Micro Diamond Prismatic Diffuser

Provides even dispersion of light though the day

Brilantor

Brilantor

Reflective Rings

Multiple Reflective Rings ensure **brightly lit interior** spaces

Safety Grills

Only daylighting unit with mandatory safety grills

International Safety Standards Compliant

Precisefitting&roofcompatibilitywithinternationalstandards

Brilantor

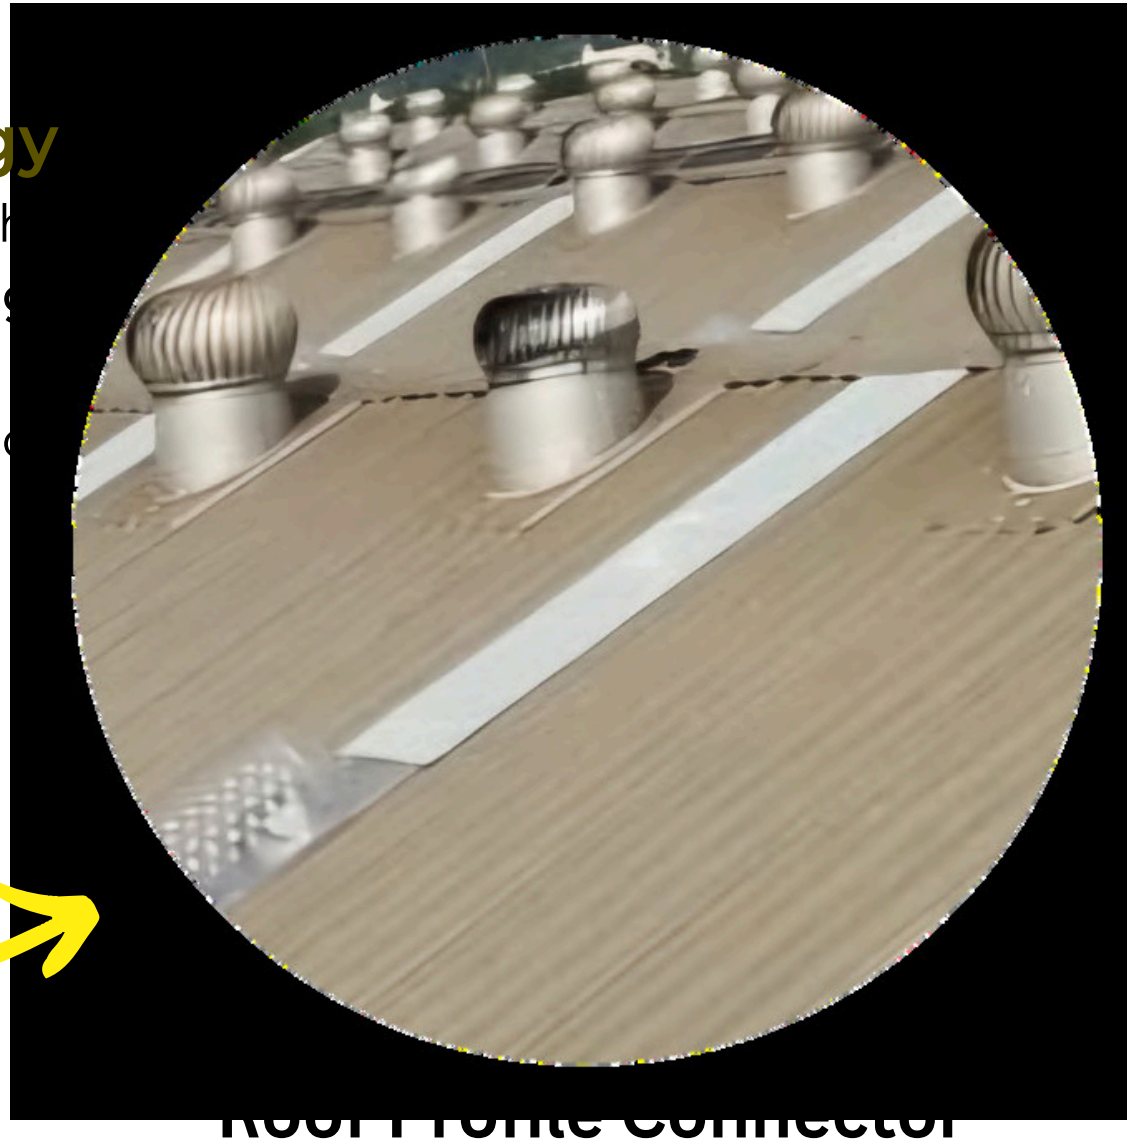

Brilantor

Anti LeakageTechnology

RoofProfileBased Connectorwith
multiple layers of **water-proofing**
which ensures site remains
leakage free over a long period
time

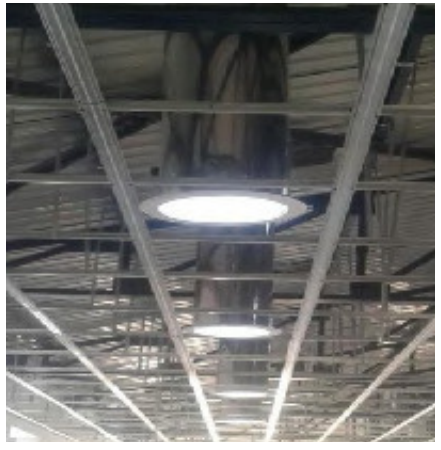

Roof Profile Connector

Brilantor

SkyPipe

- Prismatic LightCollectingDome
- Superior Reflective Tubing
- Specialised False Ceiling Solution
- UV Stabilised Units
- Roof Profile Matching Roof Adaptor

SkyPipe

crony electronics

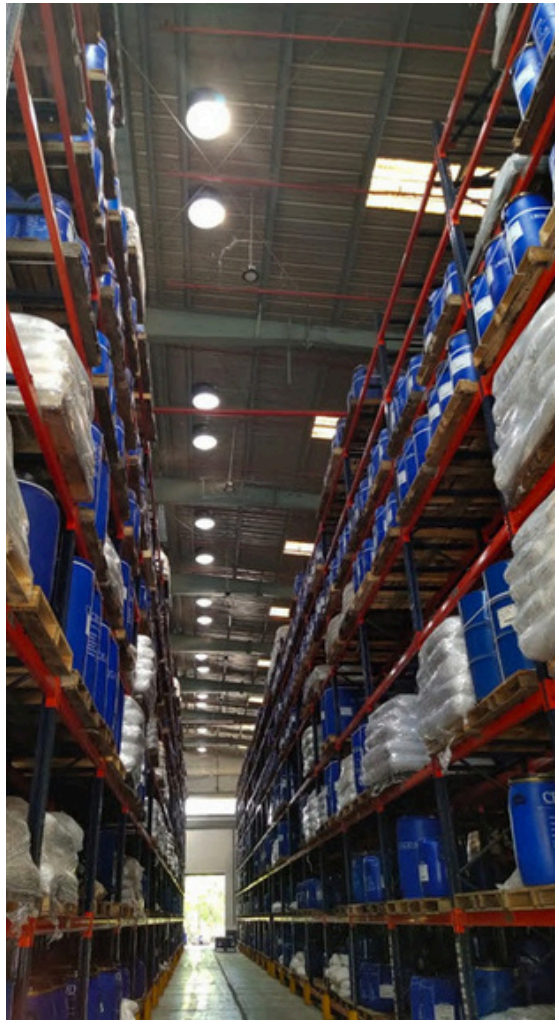

LightBall

- Prismatic LightCollectingDome
- Versatile Daylighting Solution
- UV Stabilised Units
- Roof Profile Matching Roof Adaptor

LightBall

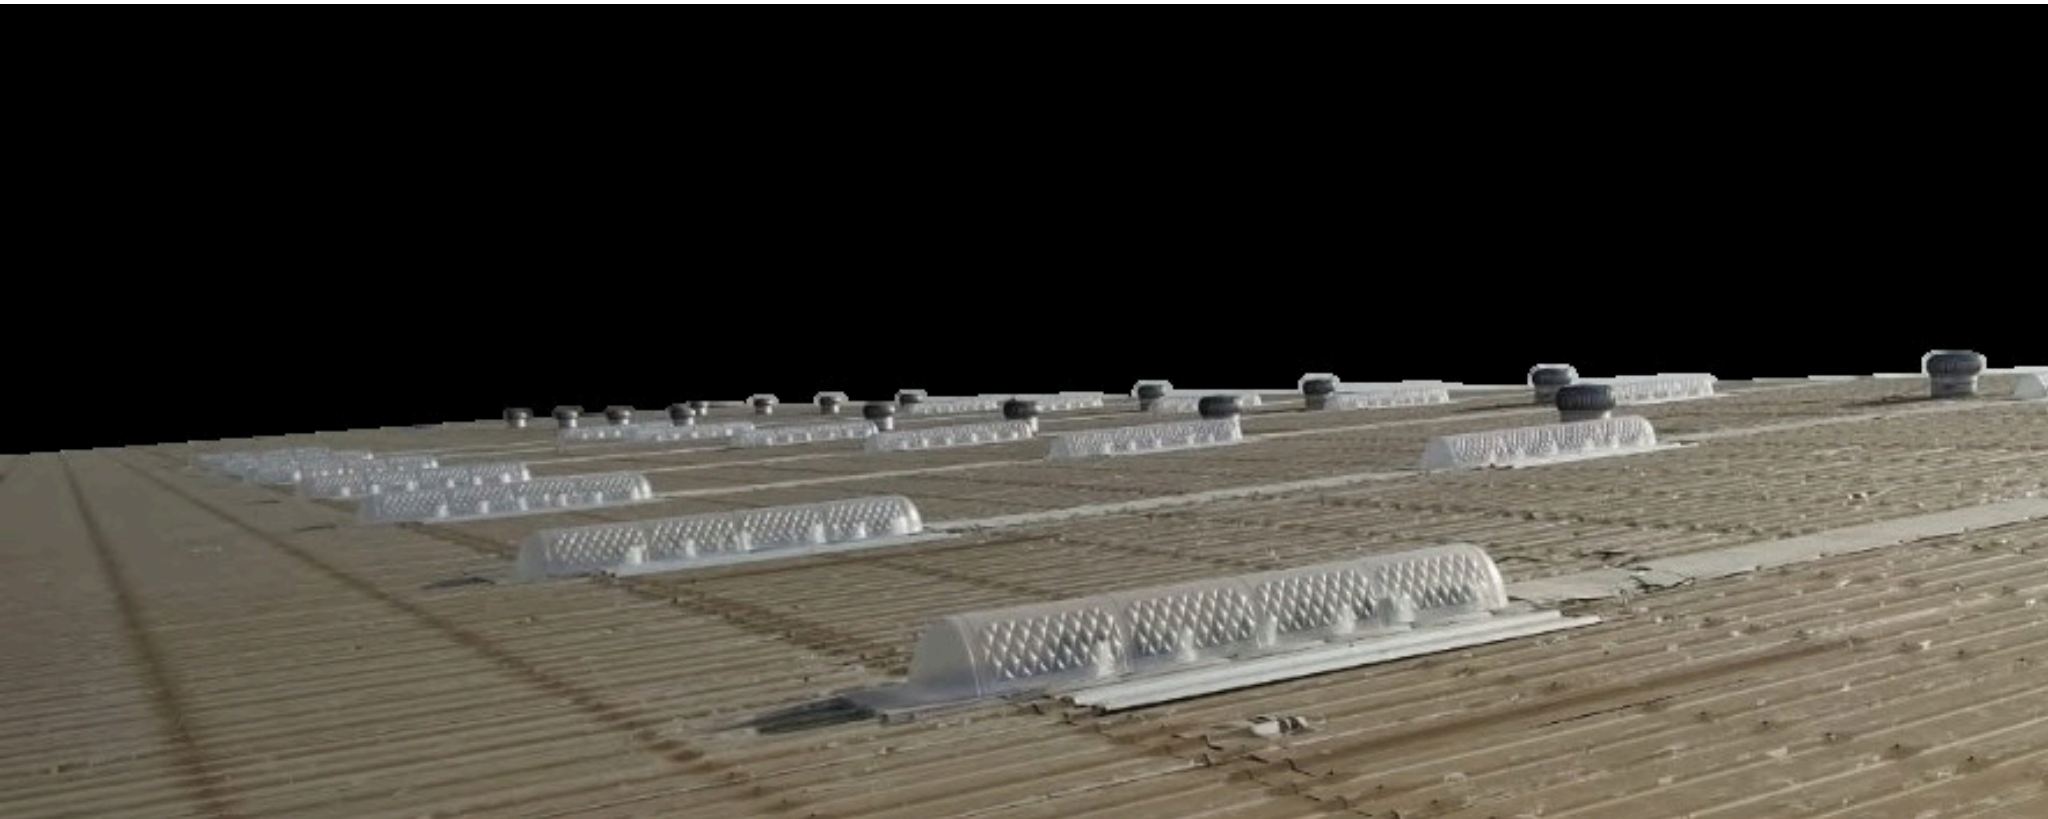

Unique project providing underground basement parking lighting solution
